

Commonwealth-State Regulation Impact Statement, 2026-27

The Office of Impact Analysis (OIA) publishes Regulation Impact Statements (RISs) with the OIA's assessment on its website as soon as practicable after a policy announcement, in consultation with the relevant Ministerial Meeting or national standard-setting body (NSSB).

The June 2023 '[Regulatory Impact Analysis Guide for Ministers' Meetings and National Standard Setting Bodies](#)' sets out the impact analysis requirements for decisions taken by intergovernmental decision-making bodies. Under the guide, a RIS only needs to be finalised with the OIA if requested by the relevant decision maker(s). As outlined in the Guide, where a RIS is commissioned by the decision maker, the default requirement is that both a Consultation RISs (C-RIS) and Decision RISs (D-RIS) must be prepared. However, a C-RIS may not be required in circumstances where the OIA has agreed that the function of the C-RIS has been achieved by an appropriate alternative mechanism.

This summary report covers Commonwealth-State C-RISs and D-RISs published on the OIA website in 2026-27 up to 1 October 2026.

- Published C-RISs and D-RISs and are available on the OIA website: [Published impact analyses | The Office of Impact Analysis](#).
- Summary reports for previous years are also available on the OIA website: [Summary Reports | The Office of Impact Analysis](#).

Department and Agency names in this report reflect their name at the time the RIS was published.
